SUMMARY

Product leader with 5+ years building multi-platform streaming products for public media. Director of Product at Local Public, a white-label streaming platform for 20+ PBS stations that grew from one station's app into an independent public benefit corporation. Leads the full product lifecycle, from strategy and hands-on design to compliance and launch.

EXPERIENCE

Director of Product Local Public · Seattle, WA — Jul 2026 – Present

- Lead product strategy and roadmap for a white-label streaming platform serving 20+ PBS member stations across nine mobile, connected TV and web platforms, plus a station-facing CMS and API.
- Built the company's product function after the spin-off, hiring the first dedicated Product Manager and managing a product designer and a partner success manager.
- With no dedicated app designer in 2026, took on app design as part of the role, designing four major releases across mobile, TV and web, ending with 3.0, the largest redesign in the platform's history.
- Directed AI agents in Figma to do the design work on top of the existing design system, and rebuilt the app and web portal design systems to be brand-neutral so every screen adapts to any partner station's brand.
- Kept every partner station compliant with new state age-verification laws, shipping on deadline with an approach that stores no user age data.
- Stood up core operations for the newly independent company: CRM, company website, station help center, and incident response and compliance programs.

Product Manager, Media and Innovation Cascade PBS · Seattle, WA — Aug 2022 – Jun 2026

- Grew a single station's streaming app into a multi-tenant SaaS platform powering 100+ station-branded apps on nine platforms, laying the groundwork for its spin-off as Local Public.
- Led a cross-functional team of about 20, spanning in-house engineering and two outside development partners, through a full platform rebuild that launched new apps on every major mobile and TV platform.
- Scaled the platform to weekly releases and launched 12 stations in a single year by building a repeatable onboarding process, support desk and station documentation.
- Owned app store release management and policy compliance across eight stores, resolving Roku certification and Apple review issues to keep launches on schedule.
- Contributed to station revenue growth, including a 53% increase in contributions through Cascade PBS's apps and an 11.2% free-to-paid conversion rate on WETA+, about three times the national PBS app's rate.

Product Manager, Immersive Experiences 3 Enrollment Marketing · Remote — Sep 2021 – Aug 2022

Promoted from Project Manager, Mar 2022

- Designed and launched 3 immersive product offerings featuring 3D virtual spaces, 360-degree media, and interactive virtual tours. Delivered 20+ white-label virtual environments for 10 higher-education clients.
- Developed 3 new product roadmaps aligned with the organizational mission to expand the product suite and unlock VR and AR product marketing channels, securing buy-in from executive stakeholders.
- Managed product development from ideation to delivery, generating 150+ qualified leads for clients.

Junior Project Manager F. Schumacher & Co. · Remote — Apr 2021 – Sep 2021

Promoted from Digital Innovation Intern, Jun 2021

- Led an AR/VR e-commerce initiative and managed web-based product development, coordinating a cross-functional remote team to drive user engagement and sales conversion.

UX Designer (Contract) MUUD Ring · Remote / Los Angeles, CA — Oct 2020 – Dec 2020

- Built a wellness startup's product roadmap and finished a stalled user research project in four weeks.
